

Case Study: **Council on Foundations (COF)** ◀

Objective:

The foundation wanted the relocation of its new corporate headquarters to a 40,000 sq ft facility to embrace and support their organizational culture and create an inspiring environment that represents their professional, progressive image and a commitment to the environment.

Client: **Council on Foundations (COF), Washington DC**
Product: **Custom Workstations with Laminate Panels and Casegoods**

Project Scope:
72 Workstations

Solution: Create an open, efficient environment with abundant light-filled workstations positioned along the perimeter space of the building's glass curtain wall to foster communication and community among staff, with several break-out areas and meeting spaces throughout the facility.

Results: Bright, private spaces for focused work, within an open-plan layout that provides ample storage, a generous work area with many custom features, and affordable "green" finishes fulfill project requirements.

Benefits: A compelling, well-designed, sustainable space that is environmentally responsible and achieves Leed Certification.
